ACL and Posterior Lateral Corner (PLC) Protocol

Phase I (0-6 weeks):

- Non-weight bearing ambulation with crutches
- Brace locked in extension – 24 hrs/day for 3 weeks- including sleep
- Cryotherapy
- Low intensity E-stim
- Patellar mobs, ankle pumps and ROM
- Stretching exercises-gastroc-soleus and hamstings
- At 3 weeks begin gentle passive ROM out of brace
  - 4th week: 0-30 degrees (at least 4x/day)
  - 5th week: 0-60 degrees (at least 4x/day)
  - 6th week: 0-90 degrees (at least 4x/day)
  - (Goal is 0-90 degrees by 6 weeks)
- Enteric-coated ASA 325 daily with food for 6 weeks

Phase II (6-12 weeks):

- Begin partial WB gait of 25% BW
- Increase WB by 25% over the next 4 weeks
- Prone hangs
- Passive flexion exercises (goal is 120 degrees)
- Patellar mobs, high intensity E-stim at 60 degrees of knee flexion
- Initiate closed chain once FWB and quad strength is 3+/5
- Stationary bike for ROM assist
- Proprioception and weight shift (KAT or BAPS board)
- Hip strengthening- no adduction if Posterior lateral corner (PLC) involved
- Open brace to full flexion- with PLC continue brace at night
- Discontinue brace at end of week 12

Phase III (4-6 months):

- 4 months post-op:
  - Closed chain PRE’s-avoid flexion beyond 70, Hip PRE’s
  - Single-leg proprioception ex. (KAT, BAPS, trampoline)
  - Stair climber, skiing machine, rower, etc
  - Aggressive flexion ROM (must be >90 degrees)
  - Straight-line jogging at the end of post-op month 4

www.AndreasSauerbreyMD.com
• 5 month post-op:
  o Initiate resisted quad and hamstring exercises
  o Progress closed chain strengthening and conditioning
  o Low-intensity plyometrics
  o Jogging and begin sprints
  o Fit for ACL/PCL brace

• 6 month post-op:
  o Progress all strengthening, exercises and plyometrics
  o Begin agility drills- figure 8’s, zig-zag, etc in brace
  o Sport specific drills

Phase III (7-12 months):

• Assess functional strength: single-leg hop for distance, timed hop test, shuttle run

• Return to sports if all criteria met:
  o Minimal pain/swelling
  o Isokinetic/functional tests within 10-15% of uninvolved side
  o Successful completion of sports specific drills and ACL/PCL brace
